National Indigenous Peoples Day is on June 21st

From the headwaters of the Columbia River north of Nakusp, to Kaslo in the West, Revelstoke in the East, and down into what is now known as Washington State, the Sinixt people lived in harmony with this land. They had extensive trade routes known as grease trails, traveled by foot and with sturgeon- nosed canoes, lived in pit houses, hunted caribou, fished and gathered wild plants and medicines.

Today they live primarily on the Colville Indian Reservation in Washington, where they form part of the Confederated Tribes of the Colville Reservation, which is recognized by the United States government as an American Indian Tribe. Many Sinixt continue to live in their traditional territory on the Northern Side of the 49th Parallel, particularly in the Slocan Valley and scattered amongst neighbouring tribes throughout BC, however the Canadian Government declared the Sinixt extinct in 1956.

To learn more visit https://sinixtnation.org and check out the book: Keeping the Lakes Way by B.C. author Paula Pryce, who relates stories shared with her by Sinixt elders living in Washington State about visiting "the Northern Territory" from time to time after the extinction, "to pick berries, trade fish and visit sacred sites."
