## The Edge CAP Site Announces New Staff

The next time you visit your neighborhood CAP site *The Edge*, you will likely notice a couple of new faces, Tanya Hall and Ellamir Froese. Tanya is our new technology trainer. She is eager to assist you with all your technology questions and training needs. Regardless of your skill level, Tanya will be able to help you become more comfortable and proficient with computers and the Internet.

Currently a Lumber Merchant at her fathers lumber yard, Tanya has a 2½ year old daughter and is a keeper of many pets. She enjoys creating things and thus her hobbies are generally based on something crafty. She also enjoys: Skating, Working, Computers, Traveling, The Great Outdoors, Building with Wood and Animals.

You can do many things at *The Edge* including creating and using your own email account; searching and surfing the internet for genealogical information or new recipes; online banking; word processing; creating your own blog and emailing pictures to friends and family. Please feel free to drop in during operating hours, meet Tanya and learn more about how she can assist you.

## Ellamir is our new Youth Intern.

Ellamir's favorite hobby is acting. She has been involved in many community theater productions over the years, since first discovering her love of the stage at the age of 6. She developed an appetite for Shakespeare while playing a role in **Julius Caesar** and has since gone on to play Adrianna in **A Comedy of Errors** and Beatrice in **Much Ado About Nothing**, both with the Kelowna Shakespeare Society. Ellamir loves the challenge and camaraderie of bringing a play to life on stage and is always looking forward to the next role.

Ellamir's other interests include: Dancing, Live Music, Traveling, Horseback Riding, Fishing, Working on her Property, Sledding, and Baking.

## Culturally Modified Cedar Trees

The Sinixt (Sin-Aist) peeled the bark off these cedars about 120 years ago, in making their canoes. These types of trees are called, "living museums". These trees were found in Edgewood and are part a heritage site. Ancient fish ladders are also found here.
